ENVIRONMENTAL MANAGEMENT SYSTEM

AFPD 32-10
Executive Order 13834

"Efficient Federal Operations"

Building Efficiency and Management	Cross-Cutting Goals
Energy Reduction	Acquisition
Renewable Energy	Electronics Stewardship
Water Management	Data Center Management
Performance Contracting	Greenhouse Gas Management and Reporting
Sustainable Buildings	
Waste Management	Fleet Management
Building Evaluations, Benchmarking and Energy Management	

The 187th Fighter Wing is committed to continued excellence, leadership, and stewardship in protecting the environment. Environmental protection is the primary management responsibility as well as the responsibility of every worker and supplier. Our vision is to reduce waste through pollution prevention, continually improving our environmental performance by minimizing our **impacts**, strive towards targets and objectives set forth by NGB, and maintain compliance with all federal, state, local and other environmental regulations at all times.

Our basic tenets include:

Environmental protection is a line responsibility and an important measure of worker performance. Every worker is responsible for environmental protection in the same manner as personnel and worker safety.

-  Compliance with all federal, state, and local environmental regulations is paramount in all we do, but additional emphasis will be placed on reducing our impacts on clean air and waters in the local area.
-  We are committed to reducing or eliminating the generation of waste. This consideration will be integrated in all future decision-making.
-  Energy conservation and energy reduction will be an integral design element for all new construction, renovations and Master Planning.

Vision of the 187th Fighter Wing

To defend the United States while upholding the highest traditions of the Tuskegee Airmen.

Mission of the 187th Fighter Wing

We deliver combat ready Airmen and aircraft for rapid deployment anytime, anywhere.

EDWARD D. CASEY, Col, AL ANG
Commander, 187th Fighter Wing
